

STEP 4 View a Detailed Report of one library's holdings compared to either the Ulrich's Core collection or the Universe of serials. In Detailed Reports you will see lists of serials and their individual strengths and weaknesses. Start by selecting which list to view: your list, the Core list, or serials in the Core which you do not have.

VIEWING YOUR DETAILED REPORT

Here we have selected Biochemistry, a sub-category of Biology, in the column titled "Ulrich's Core: Titles Library Does Not Hold."

This brings us to the report below, showing all of the titles in the Ulrich's Core that the library does not hold, which contain Biochemistry as the subject category. Here we see for each serial: ISSN, title, and publisher, plus five key criteria that help us evaluate this list and these individual titles.

Re-sort by any column heading to reorganize the list for your purposes. You may wish to sort on title for a simple alphabetical list. Or you may wish to isolate only titles available in an electronic format. By selecting that heading those titles will come to the top of the list. You may sort by publisher to group titles by publishing house. Sorting by refereed will bring peer-reviewed journals to the top of the list. Sort by Abstracted/Indexed to quickly identify all A&I titles.

Re-sorting on *Magazines for Libraries* means that titles reviewed in that publication are shown first.

If you selected a limiter, such as ISI Impact Factor, when creating this report, you will only see titles here that have been rated by JCR®Web.

Remember that limiters will "limit" the size of your list, so keep in mind that not all columns for other limit fields may be populated.

USING THIS REPORT

By viewing titles your library holds you may rate your collection by these industry standards. By viewing titles your library does not hold, but that belong to the Ulrich's Core, you may evaluate titles for collection-critical decisions, using the links to ulrichsweb.com to learn even more about a particular title.
